

PSAC/SAIT Well Testing Training Program

WELL TESTING TRAINING PROGRAM for PSAC MEMBERS

The **Well Testing Training Program** is being offered through SAIT. This training program, jointly developed by the **Petroleum Services Association of Canada (PSAC)** and **SAIT**, will provide you with the theory you need to support your on-the-job training as a well tester.

This distance education program is self-paced so you have no classes to attend and no set schedule to follow. You can learn at your own rate, while you work.

The Well Testing Training Program is divided into six independent levels which are best taken in sequence. Students who successfully complete all six levels are eligible to receive a **SAIT Certificate of Achievement in Well Testing**.

Program and Pricing Information for PSAC Members
